## Our transformation strategy is on track

### Promises kept in a tough environment

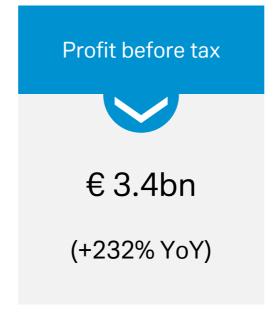

## 2021: Very successful year despite transformation

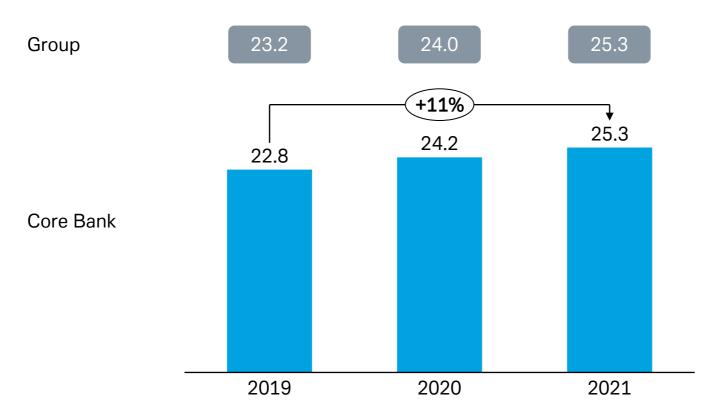

### Revenue growth higher than expected

/

Revenues ex. specific items (€ bn)

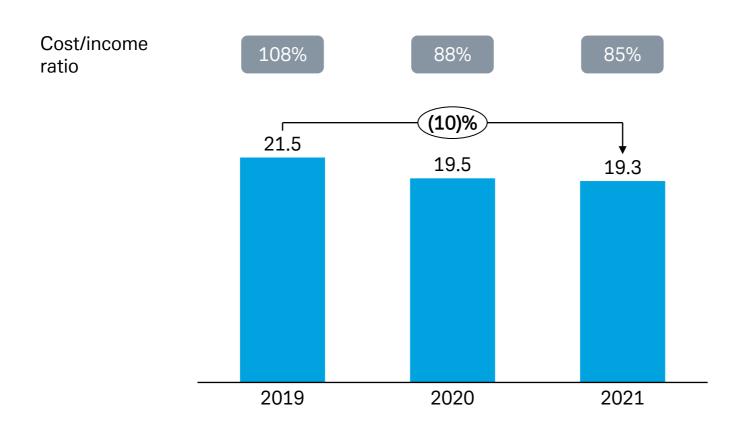

Note: Throughout this presentation totals may not sum due to rounding differences and percentages may not precisely reflect the absolute figures. Revenues excluding specific items are calculated by adjusting net revenues under IFRS for specific revenue items which generally fall outside the usual nature or scope of the business and are likely to distort an accurate assessment of the divisional operating performance. Excluded items are Debt Valuation Adjustment (DVA) and material transactions or events that are either one off in nature or belong to a portfolio of connected transactions or events where the P&L impact is limited to a specific period of time

### Costs cut consistently

Adjusted costs ex. transformation charges & Prime Finance<sup>(1)</sup> (€ bn)

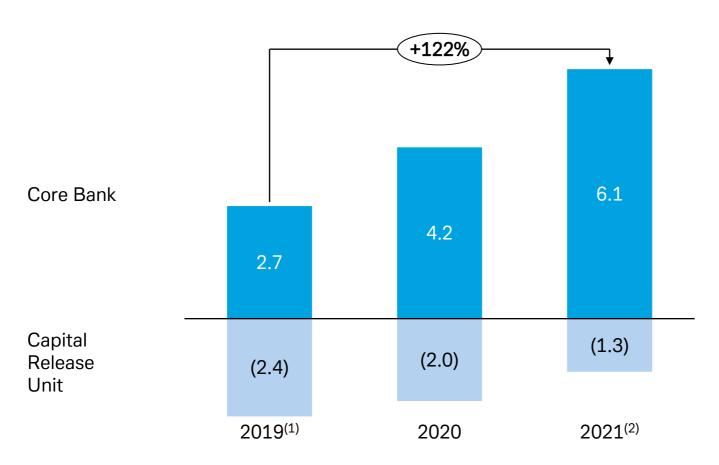

Note: Adjusted costs are calculated by deducting (i) impairment of goodwill and other intangible assets, (ii) net litigation charges and (iii) restructuring and severance (in total referred to as nonoperating costs) from noninterest expenses under IFRS

(1) Expenses eligible for reimbursement related to Prime Finance

### Cautionary statements

The figures in this presentation are preliminary and unaudited. Our Annual Report 2021 and SEC Form 20-F are scheduled to be published on 11 March 2022.

This presentation contains forward-looking statements. Forward-looking statements are statements that are not historical facts; they include statements about our beliefs and expectations and the assumptions underlying them. These statements are based on plans, estimates and projections as they are currently available to the management of Deutsche Bank. Forward-looking statements therefore speak only as of the date they are made, and we undertake no obligation to update publicly any of them in light of new information or future events.

By their very nature, forward-looking statements involve risks and uncertainties. A number of important factors could therefore cause actual results to differ materially from those contained in any forward-looking statement. Such factors include the conditions in the financial markets in Germany, in Europe, in the United States and elsewhere from which we derive a substantial portion of our revenues and in which we hold a substantial portion of our assets, the development of asset prices and market volatility, potential defaults of borrowers or trading counterparties, the implementation of our strategic initiatives, the reliability of our risk management policies, procedures and methods, and other risks referenced in our filings with the U.S. Securities and Exchange Commission. Such factors are described in detail in our SEC Form 20-F of 12 March 2021 under the heading "Risk Factors." Copies of this document are readily available upon request or can be downloaded from www.db.com/ir.
