

#NotAlone: Supporting youth mental health

#PositiveImpact

Loneliness, anxiety, depression — this pandemic has had a catastrophic effect on young people’s mental health. Our #NotAlone campaign was developed to support charities who are working to address this pressing issue. There was also a steps challenge where employees unlocked extra funding for our charities while looking after their own health and wellbeing too. We want to help get the next generation through this, both for their health and for a healthy society.
