# Strategy 2020: Medium term ambitions

## Our targets

Leverage ratio	≥5%	CET1 ratio	~11%
Organic gross savings	~EUR 3.5bn	RoTE <sup>(1)</sup>	>10%
CIR	~65%		

## Our aspiration

Payout ratio <sup>(2)</sup>	Aspiration to deliver 50%+ dividend payout ratio
-----------------------------	--

Note: Gross cost savings are countered by increasing cost from inflation, FX changes, cost of growth, cost of regulatory compliance and other cost increases

(1) RoTE: Post-tax Return on Tangible Equity is calculated as net income (loss) attributable to shareholders as a percentage of average tangible shareholders' equity. Net income (loss) attributable to shareholders is defined as Net income (loss) excluding post-tax income (loss) attributable to non-controlling interests. Tangible shareholders' equity is the shareholders' equity per balance sheet excluding goodwill and other intangible assets (2) Through dividends and/or share buybacks

## Funding profile (pre-CB&S deleveraging)

31 March 2015, external funding sources, in EUR bn

- Postbank is a self-funding entity with no material funding contribution to DB Group
- Substantial majority of funding continues to come from most stable sources
- Deconsolidation of Postbank expected to have no material impact on LCR ratio
- DB intends to fully comply with NSFR requirements
- Further positive contribution from CB&S deleveraging and GTB / Deutsche AWM growth

# Litigation: Update

In EUR bn

## Litigation reserves

- There continues to be significant uncertainty as to the timing and size of potential impacts
- Legal provisions excluding the IBOR settlement increased by EUR 0.5bn, reflecting increased provisions for certain matters and FX impacts offset by reductions as the result of settlements of various matters

## Contingent liabilities

- Includes possible obligations where an estimate can be made and outflow is more than remote but less than probable with respect to material and significant matters
- Contingent liabilities increased largely because we were able to make estimations for certain matters that previously we could not estimate

## Mortgage repurchase demands/reserves <sup>(1)</sup>

In USD

- Treated as negative revenues in NCOU
- We continue to see benign activity on the mortgage repurchase front. We cannot give any assurance that this trend will continue, particularly if there is an adverse decision concerning the statutes of limitations, an issue currently in litigation

(1) Reserves for mortgage repurchase demands are shown net of receivables in respect of indemnity agreements from the originators or sellers of certain of the mortgage loans of U.S.\$ 359 million (EUR 334 million) and U.S.\$ 359 million (EUR 295 million) as of December 31, 2014 and March 31, 2015, respectively. Gross reserves were U.S. \$ 813 million (EUR 669 million) and U.S.\$ 808 million (EUR 752 million) as of December 31, 2014 and March 31, 2015, respectively.

# Capital: Common Equity Tier 1 development

## Common Equity Tier 1 capital

In EUR bn

Note: Figures may not add up due to rounding differences

(1) CRD4/CRR rule interpretation still subject to ongoing issuance of EBA technical standards, etc. Totals do not include capital deductions in relation to additional valuation adjustments since the final draft technical standard published by EBA is not yet adopted by the European Commission. 2014 dividend accrual based on the bank's internal dividend policy.

(2) Net income attributable to Deutsche Bank shareholders from 1Q15 fully off-set by dividend accrual due to application of pay-out ratio assumption of 100% (2013 payout ratio capped at 100%) according to ECB decision from 4 Feb 2015.

(3) Before consideration of offset in shortfall of provisions to expected losses

## Events in the quarter

ECB decision on recognition of interim profits requires dividend accrual based on the highest of:

- (a) the bank's internal dividend policy
- (b) previous year's payout ratio
- (c) average payout ratio over last 3 years

- 100% of net income being accrued for 1Q15
- Minimum of 89% to be accrued for remainder of 2015, assuming 75cts/share is paid out following Annual General Meeting in May

## Outlook

Further headwinds expected from:

- EBA Regulatory Technical Standards, e.g. Prudent Valuation: Potential EUR 1.5 – 2.0 bn capital impact<sup>(3)</sup>

(1) Credit Valuation Adjustments

## Events in the quarter

- Business growth in credit and market risk
- Market risk RWA also impacted by methodology changes (EUR 3.2 bn)
- Further increase in Operational Risk RWA given recognition of external losses

## Outlook

- Further headwinds expected from:
- Impact from industry litigation settlements and continued regulatory focus on operational risks
  - Single Supervisory Mechanism / ECB, e.g.
    - Harmonization of regulatory treatments across Euro-countries
  - Continued review of RWA measurement on Basel level (e.g. fundamental trading book review, risk-weighted assets / capital floors, etc.)

# Funding activities and profile

## Funding cost and volume development

### Issuance, in EUR bn

— DB issuance spread, 4 week moving average, in bps <sup>(1)</sup>

- Funding plan of EUR 30-35bn for 2015
- Ytd issuance of EUR 19 bn at average spread of L+49 bps (ca. 30 bps inside interpolated CDS) and average tenor of 5.5 years
- EUR 8bn by public benchmark issuances / EUR 11 bn raised via retail networks and other private placements

## Funding profile well diversified

### As of 31 March 2015

- Total external funding increased by EUR 77 bn to EUR 996 bn
- 75% of total funding from most stable sources
- Liquidity Reserves EUR 203 bn, up EUR 19 bn from December 2014
- LCR ratio<sup>(2)</sup> of 124% in Mar-15

(1) Over relevant floating index; AT1 instruments excluded from spread calculation

(2) Based on DB's current interpretation of the European Commission Delegated Act, published on January 17, 2015.

# Issuance strategy

## Historical funding activities

In EUR bn

- Consistent access to capital markets during challenging market conditions

## 2015 Funding activities

- Funding plan already more than 50% completed
- Raised EUR 20 bn at average spread of 49bps over relevant floating index and average tenor of 5.4 years
- Highlights in 2015
  - EUR 1.25 bn 10yr Tier 2 at ms+210
  - USD 1.5 bn 10yr Tier 2 at T+260
  - EUR 1.5 bn 10yr senior at ms+53
- Regular issuer in US market
  - Feb 2014
    - USD 1.0bn 3 year at L+61
    - USD 1.5bn 3 year at T+75
    - USD 1.0bn 5 year at T+100
  - USD 1.25bn tap of Feb'19 at T+78
  - May 2014

    - USD 2.0bn 3 year at T+90

# Capital markets maturity profile

As of 31 Mar 2015, in EUR bn

## Maturities

Total: EUR 155 bn<sup>(1)</sup>

## Observations

- Well laddered maturity profile
- Maturities (including Postbank) not more than EUR 24 bn p.a.
- Capital issues reflected as per maturity date; Tier 1 and Tier 2 inflate 2025+ bucket; calls may accelerate redemption profile

(1) Includes Postbank maturities ranging from 0.5-3bn p.a.

(2) Tier 1 and Tier 2 maturities as per contractual maturity date

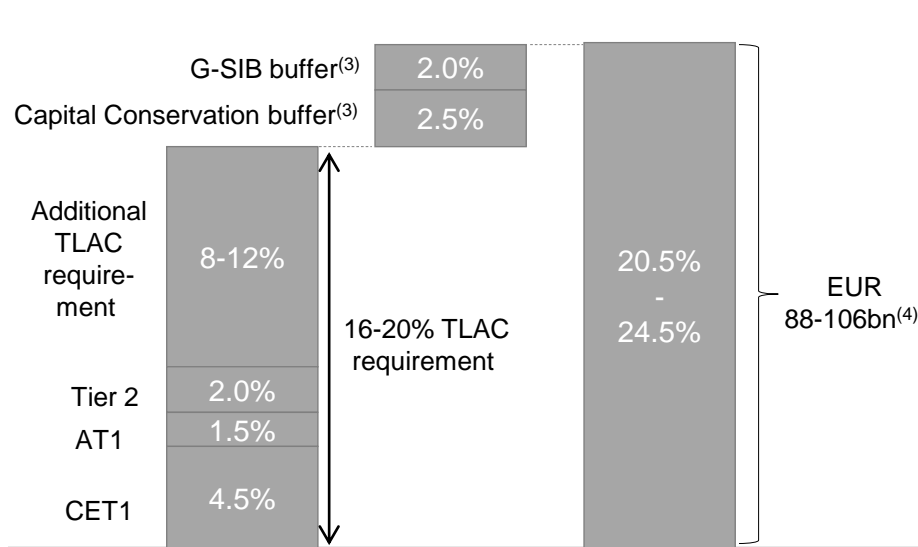

# Total Loss Absorbing Capacity (TLAC)

## DB well positioned to meet future TLAC requirements

- Final FSB guidance on TLAC expected before year-end following consultation period and expected to be based on RWA and/or leverage ratio with implementation not before January 2019
- German draft legislation<sup>(1)</sup> would rank plain-vanilla senior debt below other senior liabilities<sup>(2)</sup> in case of insolvency
- Capital stack (CET1/AT1/T2) of €66bn available to protect senior debtholders

### Potential TLAC requirement for DB

### Estimated TLAC<sup>(4)</sup> for DB

(1) The proposed law would translate the SRM into German national law effective January 2016

(2) For example: Covered bonds, covered deposits, other retail & corporate deposits, structured debt, derivatives, etc.

(3) Countercyclical buffer not considered

(4) Assuming fully loaded RWA, CET1, notionals for subordinated debt instruments, inclusion of Schuldschein loans and other domestic registered issuance as of 31 Mar 2015 and draft German law as of 29 Apr 2015 passed

# Cautionary statements

This presentation contains forward-looking statements. Forward-looking statements are statements that are not historical facts; they include statements about our beliefs and expectations and the assumptions underlying them. These statements are based on plans, estimates and projections as they are currently available to the management of Deutsche Bank. Forward-looking statements therefore speak only as of the date they are made, and we undertake no obligation to update publicly any of them in light of new information or future events.

By their very nature, forward-looking statements involve risks and uncertainties. A number of important factors could therefore cause actual results to differ materially from those contained in any forward-looking statement. Such factors include the conditions in the financial markets in Germany, in Europe, in the United States and elsewhere from which we derive a substantial portion of our revenues and in which we hold a substantial portion of our assets, the development of asset prices and market volatility, potential defaults of borrowers or trading counterparties, the implementation of our strategic initiatives, the reliability of our risk management policies, procedures and methods, and other risks referenced in our filings with the U.S. Securities and Exchange Commission. Such factors are described in detail in our SEC Form 20-F of 20 March 2015 under the heading “Risk Factors.” Copies of this document are readily available upon request or can be downloaded from [www.db.com/ir](http://www.db.com/ir).

This presentation also contains non-IFRS financial measures. For a reconciliation to directly comparable figures reported under IFRS, to the extent such reconciliation is not provided in this presentation, refer to the 1Q2015 Financial Data Supplement, which is accompanying this presentation and available at [www.db.com/ir](http://www.db.com/ir).
