| Level 3 assets | € 4bn | <ul style="list-style-type: none">— Higher carrying values on existing level 3 derivative inventory, mainly driven by movements in interest rates— Some reclassification into level 3 due to increased dispersion in market pricing |

Provision for credit losses

In € m, unless otherwise stated

- Higher provision for credit losses driven by COVID-19 pandemic
- Increased Stage 1 and 2 provisions related to COVID-19 to reflect:
 - Updated approach in-line with ECB guidance incorporating a three year average macroeconomic outlook
 - Updated macroeconomic outlook
 - Adverse rating migrations
 - Increased drawdowns on committed facilities
- COVID-19 Stage 1 and 2 provisions most pronounced in the Investment Bank and in the Corporate Bank. Modest increase in the Private Bank
- Stage 3 provisions largely in line with prior quarter, consistent with our previous guidance, reflecting a number of smaller specific events
- Allowance for loan losses of € 4.3bn (95bps of loans) adequate relative to conservatively positioned loan portfolio

(1) Estimated Q1 2020 provision for credit losses earlier in the quarter, prior to the onset of the COVID-19 pandemic

(3) Retail industry loan exposures exclude clients in more stable Food industry subsegment

Capital ratios

In € bn, except movements (in basis points), period end

CET1 ratio

- CET1 capital ratio declined by 79bps in the quarter
- ~30bps from the new securitization framework
- ~40bps due to COVID-19 pandemic, notably:
 - Client drawdowns driving higher credit risk RWA
 - Higher Prudent Valuation reserves impacting capital
 - COVID-19 impacts mostly expected to reverse over time as the environment normalizes
- ~10bps reflecting regular business growth

Leverage ratio – CRD4, fully loaded

- Leverage ratio declined by 21bps in the quarter
 - ~15bps due to COVID-19 impact including
 - ~€ 10bn net increase in leverage exposure from client drawdowns
 - ~€ 10bn from higher net derivatives and trading exposures
 - ~€ 20bn from higher pending settlements
 - ~15bps principally from seasonal rebound in trading related balance sheet
 - ~10bps benefit from our AT1 issuance

Liquidity profile

Liquidity Reserves, € bn

Liquidity Coverage Ratio⁽³⁾

Surplus above 100% requirement

- Reduced excess Liquidity Reserves and Liquidity Coverage Ratio (LCR), mainly reflecting € 18bn of drawdowns on committed credit facilities in March as we support clients
- LCR remains comfortably above regulatory requirements
- Liquidity impact has been materially lower than our internal model scenarios
- Development of Liquidity Reserves and LCR will depend on market conditions and client behaviour
- Commitment to maintain LCR comfortably above 100%

Adjusted costs

In € m, FX adjusted

Global Prime Finance⁽¹⁾

Drivers

- Reductions across all categories year-on-year
- Decline in compensation and benefit costs primarily reflects workforce reductions
- Reduced internal workforce by over 900 in the quarter
- IT costs decreased mainly due to lower software amortization
- Decrease in professional service fees and other costs reflecting continued disciplined management of non-compensation costs
- Bank levies in the quarter declined by 17% versus the prior year period

Note: Adjusted costs detailed on slide 35 and 36

- (1) Expenses associated with the Prime Finance platform being transferred to BNP Paribas and which are consistent with those eligible for reimbursement under the terms of the transfer agreement. Reimbursement is effective from 1 December 2019
- (2) Excludes severance of € 14m in Q1 2020 and € 23m in Q1 2019 as well as € 86m in Q4 2019 as they are excluded from adjusted costs

Outlook and conclusion

Comfortably on track to reach 2020 adjusted cost target⁽¹⁾

Elevated client demand and current environment make it difficult to predict opportunities and challenges in capital ratio outlook

Opportunities to support clients which we believe are in the best interests of all stakeholders

Well capitalized, highly liquid and low risk balance sheet provides a solid foundation

Strength of our franchises increasingly visible in Q1 2020

Our home market in Germany is the most stable market in which to operate

Appendix

Definition of adjustments

| | |
|-----------------------------------|---|
| Adjusted costs | Adjusted costs are calculated by deducting (i) impairment of goodwill and other intangible assets, (ii) litigation charges, net and (iii) restructuring and severance from noninterest expenses under IFRS |
| Revenues excluding specific items | Revenues excluding specific items are calculated by adjusting net revenues under IFRS for specific revenue items which generally fall outside the usual nature or scope of the business and are likely to distort an accurate assessment of the divisional operating performance. Excluded items are Debt Valuation Adjustment (DVA) and material transactions or events that are either one-off in nature or belong to a portfolio of connected transactions or events where the P&L impact is limited to a specific period of time |
| Transformation charges | Transformation charges are costs, included in adjusted costs, that are directly related to Deutsche Bank's transformation as a result of the new strategy announced on 7 July 2019. Such charges include the transformation-related impairment of software and real estate, the quarterly amortization on software related to the Equities Sales and Trading business and other transformation charges like onerous contract provisions or legal and consulting fees related to the strategy execution |
| Transformation-related effects | Transformation-related effects are financial impacts, in addition to transformation charges, resulting from the new strategy announced on 7 July 2019, which are recorded outside of adjusted costs. These include goodwill impairments in the second quarter 2019, as well as restructuring and severance expenses from the third quarter 2019 onwards. In addition to the aforementioned pre-tax items, transformation-related effects on a post-tax basis include pro-forma tax effects on the aforementioned items and deferred tax asset valuation adjustments in connection with the transformation the Group |
| Adjusted profit (loss) before tax | Adjusted profit (loss) before tax is calculated by adjusting the profit (loss) before tax under IFRS for specific revenue items, transformation charges, impairment of goodwill and other intangible assets and restructuring and severance |

Q1 2020 bridge from EU IFRS to IASB IFRS

Profit (loss), in € m

- Deutsche Bank's financial statements have historically been prepared based on the International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and endorsed by the European Union ("EU")
- From 2020, the Group will apply fair value hedge accounting for portfolio hedges of interest rate risk (macro hedging) under the EU carve out version of IAS 39 (EU IFRS). This results in a difference between IFRS as endorsed by the EU and IFRS as issued by the IASB
- Accordingly, the Group's first quarter 2020 profit is € 70m higher under EU IFRS compared to IFRS as issued by the IASB (Profit before tax impact € 132m)
- To reflect reporting obligations in Germany and the US, Deutsche Bank is preparing separate sets of interim financial information from Q1 2020 onwards (i.e. locally: based on IFRS as endorsed by the EU; US: based on IFRS as issued by the IASB)

Deposit charging

Quarterly revenue impact, € m

Charging agreements⁽¹⁾, € bn

- Implemented charging agreements to pass through negative interest rates to clients on a total of € 10bn of deposit balances in the quarter
- Deposit attrition better than forecast with lower than expected reduction in Euro deposits and growth in USD deposits
- On track to generate an incremental € 100m in revenues from passing through of negative interest rates in 2020, ahead of plan
- Private Bank in Germany will include negative interest rate charges in contracts for newly opened Euro current accounts in excess of € 100k
- Actively advising retail customers to navigate through this period of continued low interest rates

Cautionary statements

This presentation contains forward-looking statements. Forward-looking statements are statements that are not historical facts; they include statements about our beliefs and expectations and the assumptions underlying them. These statements are based on plans, estimates and projections as they are currently available to the management of Deutsche Bank. Forward-looking statements therefore speak only as of the date they are made, and we undertake no obligation to update publicly any of them in light of new information or future events.

By their very nature, forward-looking statements involve risks and uncertainties. A number of important factors could therefore cause actual results to differ materially from those contained in any forward-looking statement. Such factors include the conditions in the financial markets in Germany, in Europe, in the United States and elsewhere from which we derive a substantial portion of our revenues and in which we hold a substantial portion of our assets, the development of asset prices and market volatility, potential defaults of borrowers or trading counterparties, the implementation of our strategic initiatives, the reliability of our risk management policies, procedures and methods, and other risks referenced in our filings with the U.S. Securities and Exchange Commission. Such factors are described in detail in our SEC Form 20-F of 20 March 2020 under the heading “Risk Factors.” Copies of this document are readily available upon request or can be downloaded from www.db.com/ir.

This presentation also contains non-IFRS financial measures. For a reconciliation to directly comparable figures reported under IFRS, to the extent such reconciliation is not provided in this presentation, refer to the Q1 2020 Financial Data Supplement, which is accompanying this presentation and available at www.db.com/ir.
