Deutsche Bank – Q2 2018 results

25 July 2018

Execution on strategic plan to materially improve returns to shareholders over time

Conservative balance sheet management provides a solid basis to continue reshaping the franchise and focus on growth

Private & Commercial Bank: legal entity merger and integration of Sal. Oppenheim completed

Corporate & Investment Bank: optimization of capital & resource allocation – including leverage reductions – is well underway

Asset Management: Delivering on our communicated strategy in DWS

On track to meet our near-term adjusted cost and headcount reduction targets

Q2 2018 results demonstrate the resilience of our franchise

Note: Throughout this presentation totals may not sum due to rounding differences

(1) Throughout this presentation to exclude the FX effect the prior year figures were recalculated using the corresponding current year's monthly FX rates applied to the estimated currency mix

(2) Profit before tax means Income before income taxes (IBIT) under IFRS

(3) Litigation, restructuring & severance, impairment of goodwill and other intangibles and policyholder benefits and claims

(4) Throughout this presentation adjusted costs defined as total noninterest expenses excluding restructuring & severance, litigation, impairment of goodwill and other intangibles and policyholder benefits and claims

A conservatively managed balance sheet

As of 30 June 2018

Common Equity Tier 1 capital ratio	13.7%[1]	CET1 excess above SREP requirement: € 11bn[2]
Total loss-absorbing capacity	€ 119bn	Excess above MREL and TLAC requirement: € 18bn / € 40bn[3]
Provision for credit losses as a % of loans H1 2018	9 bps[4]	Strong underwriting track record
Average Value-at-Risk H1 2018	€ 27m	Tightly controlled market risk
Loans as a % of deposits	75%	>70% of loans are mortgages and investment grade corporates
Liquidity coverage ratio	147%	Excess above LCR requirement of 100%: € 77bn

(1) CET1 capital excludes H1 2018 net income of € 0.5bn (~15 bps) on CRR/ECB guidance requiring an assumed 100% payout ratio
(2) Requirement for 2018, as part of Supervisory Review and Evaluation Process (SREP): 10.6%
(3) 2018 requirement for Minimum Requirement for Eligible Liabilities (MREL) set at 9.14% of Total Liabilities and Own Funds of € 1,102bn. Most binding 2019 requirement for Total Loss Absorbing Capacity (TLAC) set at 6.0% of leverage exposure
(4) Year-to-date provision for credit losses annualized as a % of loans at amortized cost

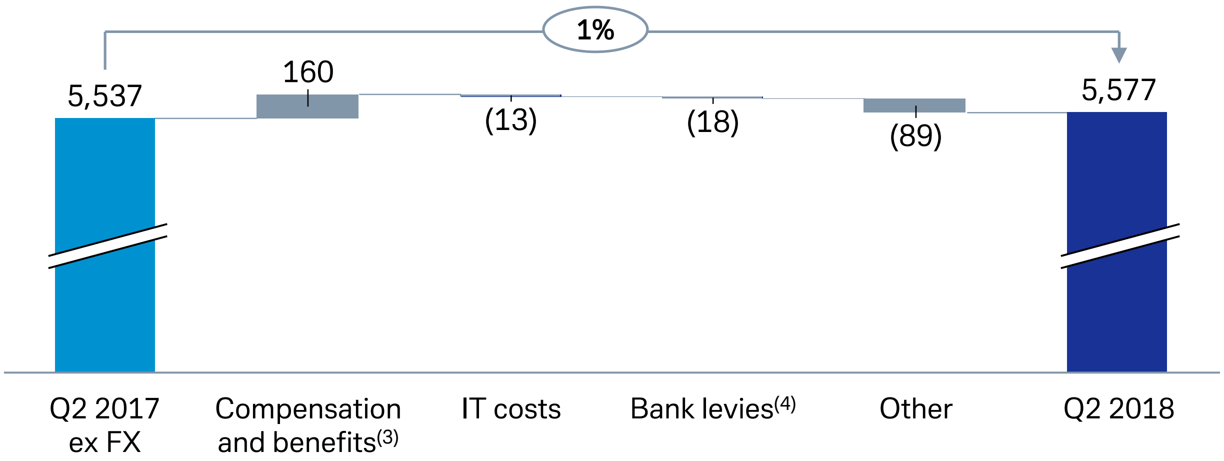
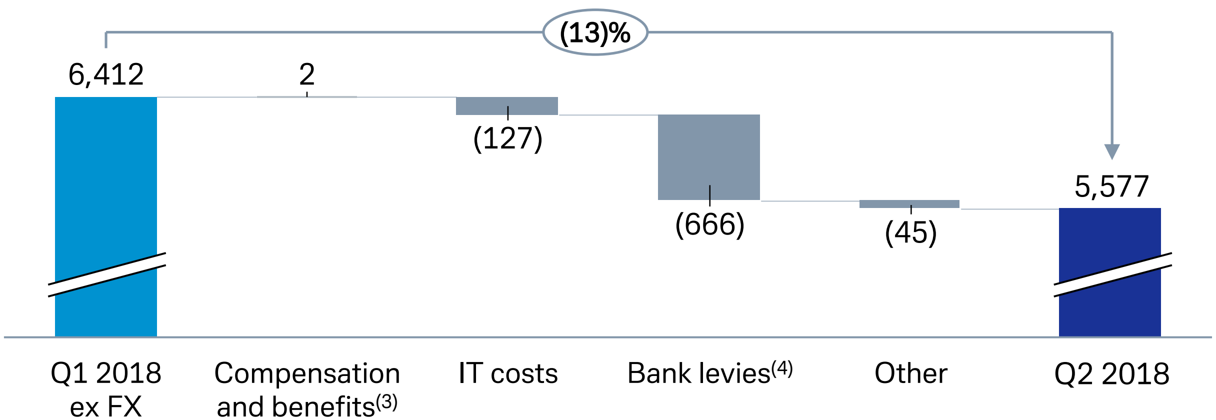
Adjusted costs[1]

€ m, FX adjusted[2]





- Delivering in line with targets
- Compensation and benefits: YoY increase reflects higher deferrals from normalisation of compensation framework in 2017 and more even distribution of current year variable compensation accruals
- Other costs declined YoY including cuts in professional services and vendor spend
- Bank levies mostly recognised in Q1 2018
- Managing for sequential declines in adjusted costs in remainder of the year

(1) Total noninterest expenses were: Q2 2017: 5,715; Q2 2017 ex FX: 5,618; Q1 2018: 6,457; Q1 2018 ex FX: 6,523; Q2 2018 5,784

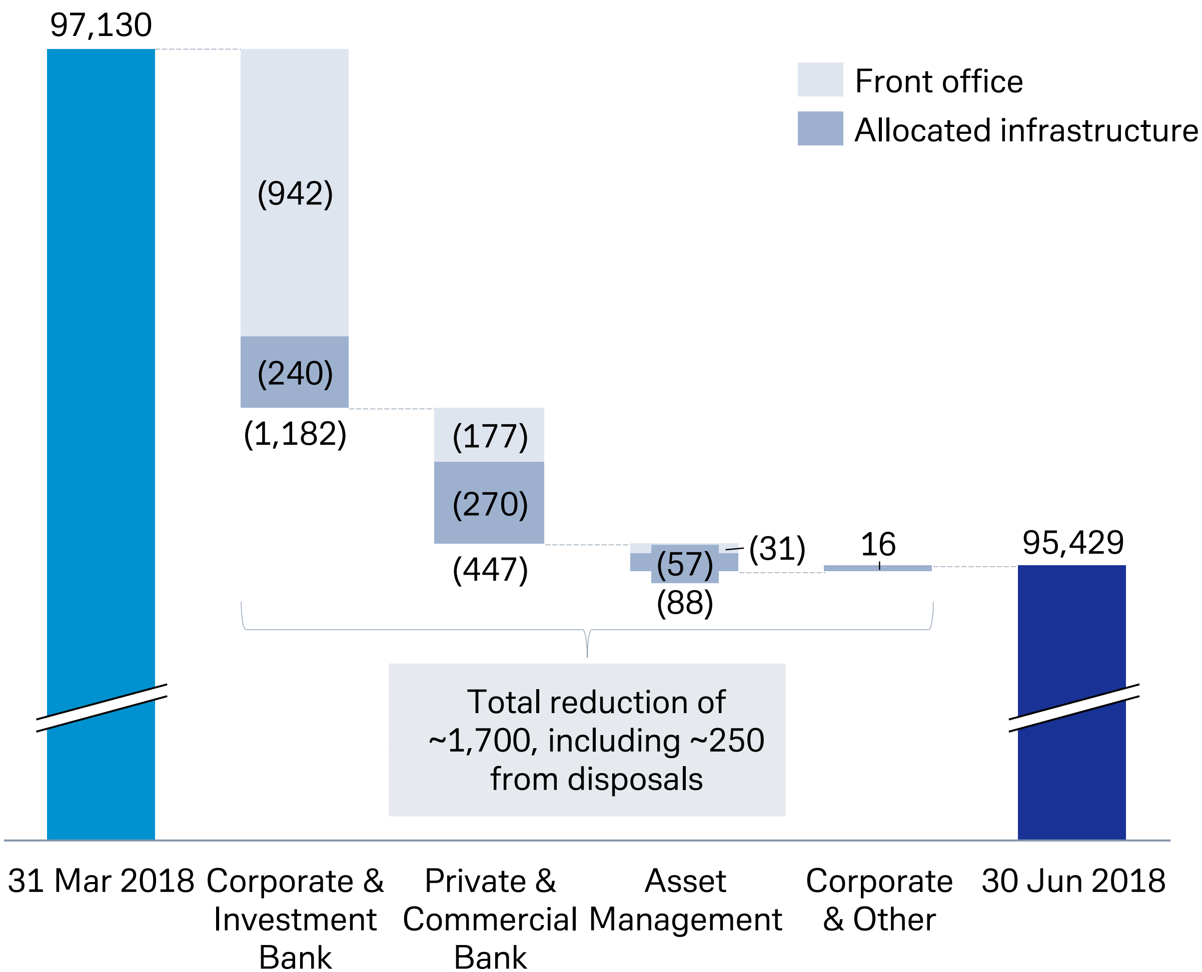
Employees

Full-time equivalents

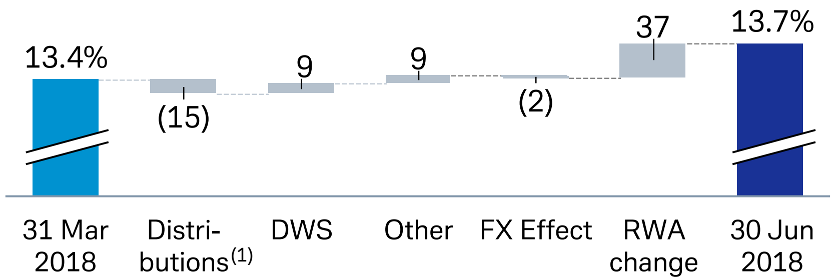


- On track to meet <93,000 target by year-end 2018
- Reduction in the quarter primarily driven by front office staff in Corporate & Investment Bank with a focus in Corporate Finance and Equity Sales & Trading
- Private & Commercial Bank: Reductions in German business partly offset by selected hiring in Wealth Management and internalization of IT staff
- Targeted increase in regulatory and risk functions
- Reduction of ~1,400 expected from disposal of retail business in Poland at or around year-end

Capital ratios

€ bn except movements (in basis points), CRD4, fully loaded

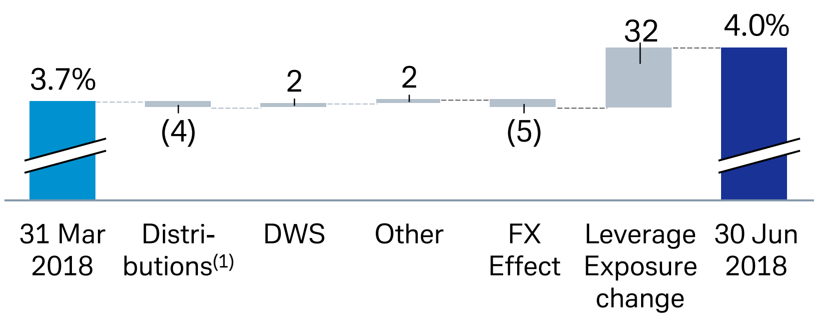
CET1 ratio



CET1 Capital	47.3	(0.5)	0.3	0.3	0.4		47.9
RWA	354				4	(10)	348

- — CET1 capital ratio remains above 13%
- — Reduced risk-weighted assets (RWA) in CIB as we refocus resources:
  - — Reduction across trading businesses (~€ 5bn) reflecting generally lower Market Risk levels as well as the RWA impacts of deleveraging
  - — Lower credit risk RWA in Corporate Finance (~€ 2bn) and non strategic portfolios (~€ 1bn)
- — H1 2018 net income of € 0.5bn (~15bps) not recognized in CET1 capital given CRR / ECB guidance requiring an assumed 100% payout ratio

Leverage ratio



Tier 1 Capital	52.0	(0.5)	0.3	0.3	0.4		52.5
Leverage Exposure	1,409				29	(114)	1,324

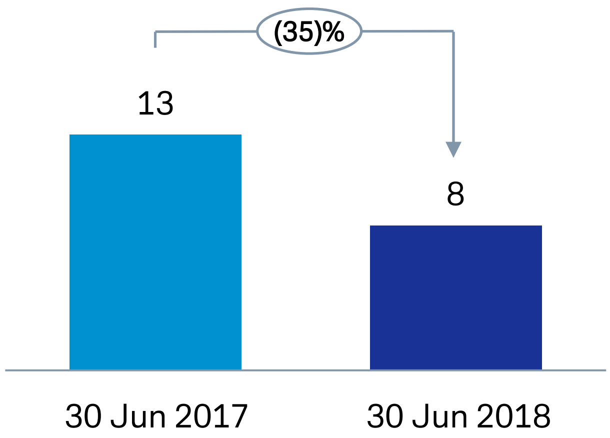
- — Good progress towards 4.5% leverage ratio target
- — Improvement in leverage ratio in the quarter driven by € 85bn reduction in reported leverage (€ 114bn FX-neutral) as we execute on our strategy
- — Business deleveraging split equally between Equities and FIC (~€ 40bn each), excluding FX, cash allocations and pending settlements

(1) Common equity dividend payment for the financial year 2017 and the annual AT1 coupon payment in the second quarter of 2018

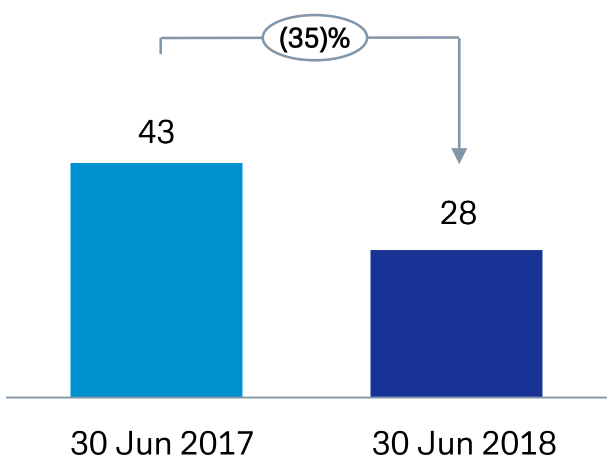
Non-strategic legacy assets in CIB

€ bn

Risk weighted assets excluding operational risk



Leverage exposure



Background

- Non-strategic portfolio created to facilitate the run-down of residual CIB assets in the former non-core operations unit and other items not consistent with the CIB strategy

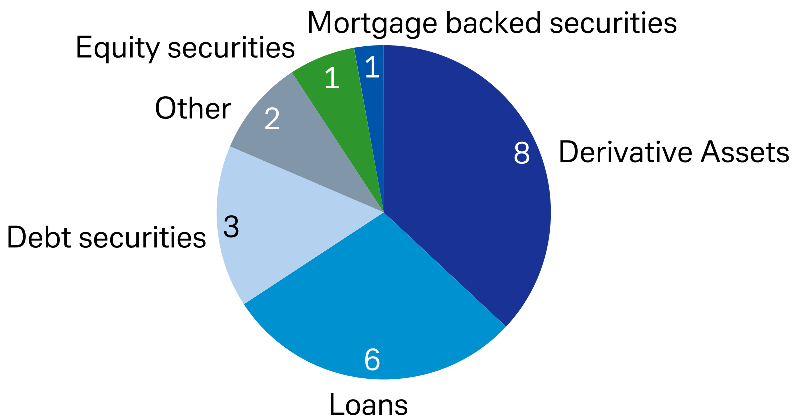
Recent performance

- Risk weighted assets and leverage exposure reduced by approximately half since inception driven by run-off and portfolio sales
- Portfolio now primarily includes rates, credit, residual non-core and shipping assets
- Natural portfolio run-off will continue over coming years, particularly credit assets. We will accelerate if economic to do so
- Figures do not yet include the ~€ 800m risk-weighted asset reduction from the sale of a shipping portfolio which is expected to close in the third quarter
- As a result of recent strategy changes, a small amount of US inflation options inventory to be added in Q3 2018
- H1 2018 revenues less credit loss provisions of € 60m

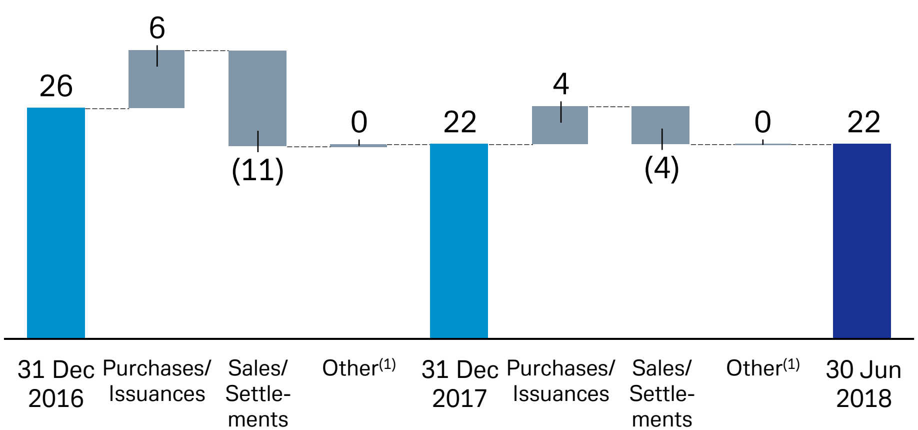
Level 3 assets

€ bn, as of 30 June 2018

Assets (total: € 22bn)



Movements in balances



- Level 3 assets arise as a consequence of the bank being active in various markets, some of which are less liquid
- Assets are mainly booked in core businesses – only € 1.4bn are part of CIB non-strategic book
- Level 3 classification is not an indicator of risk or asset quality, but rather an accounting indicator of valuation uncertainty due to lack of observability of at least one valuation parameter
- Variety of mitigants to valuation uncertainty:
  - Many valuation inputs are observable
  - Exchange of collateral with derivative counterparties
  - Uncertain input often hedged – e.g. in Level 3 liabilities
  - Prudent valuation capital deductions[2] specific to Level 3 balances of ~€ 0.4bn
  - Deferred Day 1 profit on Level 3 balances of ~€ 0.4bn
- Portfolio is not static, as evidenced by significant inflows and outflows relative to the starting balances

(1) Transfers, mark-to-market, IFRS 9
(2) Additional value adjustments deducted from CET 1 capital pursuant to Article 34 of Regulation (EU) No. 575/2013 (CRR)

Global Transaction Banking:

— Higher, driven by a gain on sale on an asset disposal

Origination & Advisory:

— Growth driven by higher Advisory revenues on execution of deal pipeline

— Market share gains in leveraged debt origination

Sales & Trading (Fixed Income):

— Decrease driven by Credit (on strong prior year in Structured and underperformance in Flow) and Rates (particularly in Europe)

Sales & Trading (Equity):

— Lower in Cash and Derivatives, while Prime Finance significantly higher

Private and Commercial Business (Germany):

— Growth in mortgage and commercial loans offset by continued deposit margin compression

— Revenues slightly higher driven by non-recurrence of € (118)m from termination of a legacy Trust Preferred Security recorded in Q2 2017

Private and Commercial Business (International):

— Loan growth in Italy and Spain more than offset the impact of continued deposit margin compression

— Revenues slightly lower driven by non-recurrence of a small gain on asset sale in Q2 2017

Wealth Management (Global):

— Revenue growth in Asia Pacific offset difficult conditions in EMEA

— Revenues essentially flat, excluding € 54m lower contribution from legacy Sal. Oppenheim

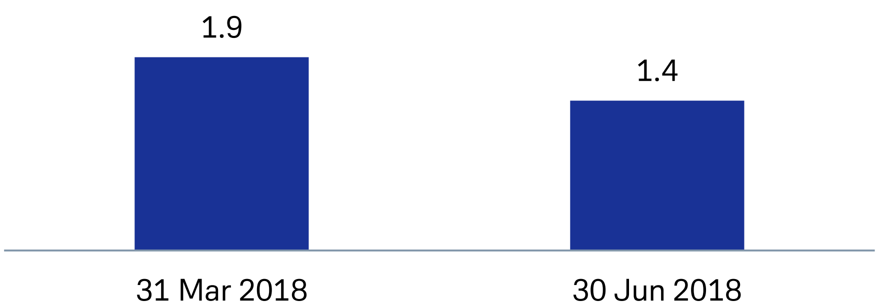
Litigation update

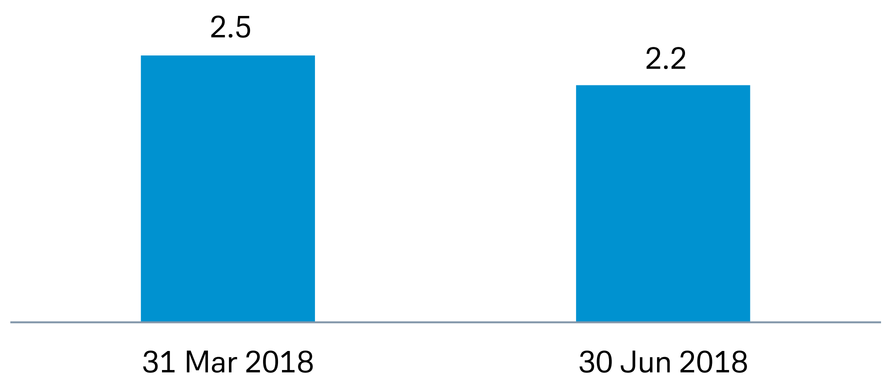
€ bn, unless stated otherwise

Litigation provisions[1]



- Decrease predominately due to settlement payments for major cases, releases for lower than expected settlements partially offset by additions for other cases
- Further progress in resolving legacy matters, including:
  - F/X: Settlement reached with the New York State Department of Financial Services
  - Pre-release ADRs: Settlement reached with the US Securities and Exchange Commission
- € 0.2bn of the provisions reflect already achieved settlements or agreements-in-principle to settle

Contingent liabilities[1]



- Includes possible obligations where an estimate can be made and outflow is more than remote but less than probable for significant matters
- Decrease primarily driven by reclassifications of certain cases to provisions and out of contingent liabilities

Note: Figures reflect current status of individual matters and are subject to potential further developments

(1) Includes civil litigation and regulatory enforcement matters

Cautionary statements

This presentation contains forward-looking statements. Forward-looking statements are statements that are not historical facts; they include statements about our beliefs and expectations and the assumptions underlying them. These statements are based on plans, estimates and projections as they are currently available to the management of Deutsche Bank. Forward-looking statements therefore speak only as of the date they are made, and we undertake no obligation to update publicly any of them in light of new information or future events.

By their very nature, forward-looking statements involve risks and uncertainties. A number of important factors could therefore cause actual results to differ materially from those contained in any forward-looking statement. Such factors include the conditions in the financial markets in Germany, in Europe, in the United States and elsewhere from which we derive a substantial portion of our revenues and in which we hold a substantial portion of our assets, the development of asset prices and market volatility, potential defaults of borrowers or trading counterparties, the implementation of our strategic initiatives, the reliability of our risk management policies, procedures and methods, and other risks referenced in our filings with the U.S. Securities and Exchange Commission. Such factors are described in detail in our SEC Form 20-F of 16 March 2018 under the heading "Risk Factors." Copies of this document are readily available upon request or can be downloaded from www.db.com/ir.

This presentation also contains non-IFRS financial measures. For a reconciliation to directly comparable figures reported under IFRS, to the extent such reconciliation is not provided in this presentation, refer to the Q2 2018 Financial Data Supplement, which is accompanying this presentation and available at www.db.com/ir.
