In accordance with Article 13 paragraph 2 of the Law, investors who have already agreed to purchase or subscribe for the Securities before this Supplement is published have the right, exercisable within a time limit of two working days, which is 17 June 2015, after the publication of this Supplement, to withdraw their acceptances.

The Issuer has requested the Commission de Surveillance du Secteur Financier (the "CSSF") to provide the competent authorities in Austria, Belgium, Denmark, France, Germany, Ireland, Italy, the Netherlands, Portugal, Spain, Sweden and the United Kingdom of Great Britain and Northern Ireland, with a certificate of approval (a "Notification") attesting that this Supplement has been drawn up in accordance with the Law. II. RISK FACTORS

1. The information on ratings by Moody's in the section “Risk Factors in respect of the Issuer” on page 35 of the Prospectus shall be replaced by the following:

*by Moody’s:*

<table>

<tr>
<th>Rating Type</th>

<td>A3</td>
<td>Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.</td>

</tr>
<tr>
<td>Outlook</td>
<td>Negative</td>
<td>A rating outlook is an opinion regarding the likely rating direction over the medium term.</td>
</tr>
</tbody>
</table>

Moody's defines:

A3: Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.

Moody's long-term obligation ratings are divided into several categories ranging from "Aaa", reflecting the highest quality, subject to the lowest level of credit risk, over categories "Aa", "A", "Baa", "Ba", "B", "Caa", "Ca" to category "C", reflecting the lowest rated obligations which are typically in default, with little prospect for recovery of principal or interest. Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from "Aa" through "Caa". The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

P-2: Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody's short-term ratings are divided into several categories ranging from "P-1", reflecting a superior ability of an issuer to repay short-term debt obligations, over categories "P-2" and "P-3" to category "NP", reflecting that an issuer does not fall within any of the Prime rating categories.

2. The information on ratings by S&P in the section “Risk Factors in respect of the Issuer” starting on page 35 of the Prospectus shall be replaced by the following:

*by S&P:*

<table>
<thead>
<tr>
<th>Rating Type</th>
<th>Rating</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Long-term Rating</td>
<td>BBB+</td>
<td>An obligor rated 'BBB' has adequate capacity to meet its financial commitments. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitments.</td>
</tr>
<tr>
<td>Short-term Rating</td>
<td>A-2</td>
<td></td>
</tr>
<tr>
<td>Outlook</td>
<td>Stable</td>
<td></td>
</tr>
</tbody>
</table>

S&P defines:

BBB+: An obligor rated 'BBB' has adequate capacity to meet its financial commitments. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitments.
Long-term issuer credit ratings by S&P are divided into several categories ranging from "AAA", reflecting the strongest creditworthiness, over categories "AA", "A", "BBB", "BB", "B" "CCC", "CC", "R" to category “SD” and “D”, reflecting that an obligor is in (selective) default. The ratings from "AA" to "CCC" may be modified by the addition of a plus ("+") or minus ("–") sign to show relative standing within the major rating categories.

A-2: An obligor rated 'A-2' has satisfactory capacity to meet its financial commitments. However, it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in the highest rating category.

Short-term ratings by S&P are divided into several categories ranging from "A-1", reflecting the strongest creditworthiness, over categories "A-2", "A-3", "B", "C", "R" to category “SD” and “D”, reflecting that an obligor is in (selective) payment default.

stable: An S&P rating outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future CreditWatch action. Rating outlooks fall into five categories: positive, negative, stable, developing and n.m. (not meaningful).

CreditWatch highlights S&P’s opinion regarding the potential direction of a short-term or long-term rating. It focuses on identifiable events and short-term trends that cause ratings to be placed under special surveillance by S&P’s analytical staff. A CreditWatch listing, however, does not mean a rating change is inevitable, and when appropriate, a range of potential alternative ratings will be shown. CreditWatch is not intended to include all ratings under review, and rating changes may occur without the ratings having first appeared on CreditWatch. The "positive" designation means that a rating may be raised; "negative" means a rating may be lowered; and "developing" means that a rating may be raised, lowered, or affirmed.”
