“As of the publication date of the latest supplement to the Prospectus, the following senior debt ratings were assigned to Deutsche Bank:

<i>Rating Agency</i>	<i>Long-term rating</i>	<i>Short-term rating</i>
Moody’s	Baa2 (outlook: stable)	P-2 (outlook: stable)
S&P	BBB+ (outlook: negative)	A-2 (outlook: stable)
Fitch	A- (outlook: negative)	F1 (outlook: negative)
DBRS	A (low) (outlook: negative)	R-1 (low) (outlook: stable)”

## II. RISK FACTORS

The information on ratings by Fitch in the section "Risk Factors in respect of the Issuer" on pages 35 and 36 of the Prospectus shall be replaced by the following:

"by Fitch:	long-term rating:	A- (outlook: negative)
	short-term rating:	F1 (outlook: negative)

Fitch defines:

A-: A rating of "A" denotes expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

Fitch's long-term ratings are divided into several major categories ranging from "AAA", reflecting the highest credit quality, over categories "AA", "A", "BBB", "BB", "B", "CCC", "CC", "C" to categories "RD", "D", reflecting that an obligor has defaulted on some or all of its obligations and has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure or has otherwise ceased business, respectively. A plus "+" or minus "-" sign may be appended to a rating to denote the relative status within major rating categories. Such suffixes are not added to the "AAA" category or to categories below "B".

F1: A rating of "F1" indicates the strongest intrinsic capacity for timely payment of financial commitments. It may have an added plus "+" sign to denote any exceptionally strong credit feature.

Fitch's short-term ratings are divided into several categories ranging from "F1", reflecting the highest credit quality, over categories "F2", "F3", "B", "C", "RD" to category "D" which indicates a broad-based default event for an entity, or the default of a short-term obligation.

negative: Rating Outlooks indicate the direction a rating is likely to move over a one- to two-year period. They reflect financial or other trends that have not yet reached the level that would trigger a rating action, but which may do so if such trends continue. Positive or Negative rating Outlooks do not imply that a rating change is inevitable and, similarly, ratings with Stable Outlooks can be raised or lowered without a prior revision to the Outlook, if circumstances warrant such an action. Occasionally, where the fundamental trend has strong, conflicting elements of both positive and negative, the Rating Outlook may be described as Evolving.

Rating Watches indicate that there is a heightened probability of a rating change and the likely direction of such a change. These are designated as "Positive", indicating a potential upgrade, "Negative", for a potential downgrade, or "Evolving", if ratings may be raised, lowered or affirmed. However, ratings that are not on Rating Watch can be raised or lowered without being placed on Rating Watch first, if circumstances warrant such an action."

TO THE EXTENT THAT THERE IS ANY INCONSISTENCY BETWEEN (A) ANY STATEMENT IN THIS SUPPLEMENT AND (B) ANY STATEMENT IN, OR INCORPORATED BY REFERENCE IN, THE PROSPECTUS, THE STATEMENTS IN (A) ABOVE SHALL PREVAIL.
