## Our headquarters – state-of-the-art towers

We will implement a series of innovative and forward-looking measures to improve building performance and occupant comfort standards.

Daylight optimization using automatic louvers and dimming controls

Power saving by intelligent lighting systems

Natural air supply thanks to operable windows

8,500 ft<sup>2</sup> additional space by compact plant layout

Water retention by greening up the roofs

Increased occupancy by flexible space allocation

Lower energy consumption using heat pump with thermal energy storage

Reduced heat ingress due to new glazing

Improved indoor environment quality by radiant cooling

Storm water use and in-house water recycling

Warm water production with solar power

## Our headquarters – global leadership in refurbishment

We will transform our office towers in Frankfurt, Germany into a "green building".  
Our aim is to set benchmarks for future projects - based on sustainable improvements.

Combination of basic module "Sustainability and Deutsche Bank" and tailor-made modules for business units:

## Sustainability and Deutsche Bank

Introduction: Basic awareness of sustainability, meaning for Deutsche Bank, areas of action, role of the financial sector, climate change, reputation, ESG risks

## Employee commitment & strategic readiness

- Deutsche Bank has developed a practice of regular employee surveying that distinguishes us from the competition. This process allows us to capture feed-back and to use it appropriately in decision making
- One of the main outcomes of these surveys is the Commitment Index which is regularly communicated in the DB Annual Report. Commitment is determined by the degree of willingness to perform beyond usually expected level (engagement), the expectation to remain part of the organization (retention), and the emotional involvement with the organization (identification)
- The statistical model of the survey concept has continuously undergone further development and has more recently been reviewed in order to become a strategic OD tool with strong business alignment
- Having been conducted globally among a representative sample in 6 languages, the reviewed 2007 edition of the survey covered all staff worldwide and was available in 12 languages

### DB Commitment Index since 2000

# Deutsche Bank Mission Statement on Sustainability – basic principles for decisions within the Group

We believe sustainability means future viability with the aim of ensuring future generations enjoy a healthy environment as well as stable economic and social conditions. We are committed to this guiding principle

Taking sustainability into account serves to secure our long-term corporate value. Sustainability is an integral component of our business making decisions. We go beyond legal requirements in taking into account social, ethical and ecological aspects in our everyday business. We review and continually improve our everyday work procedures according to sustainability-related criteria.

We are committed to ensuring our staff members enjoy a healthy work environment, with legal requirements as the absolute minimum in this respect. As far as possible we use the most eco-friendly technology with the aim of preserving natural resources.

We regularly monitor our operations and goals.

We also believe that sustainability implies a clear commitment to developing sustainable concepts. Our proactive co-operation and solution-oriented dialogue with international partners reflect our sense of global responsibility.

## Cautionary statements

This presentation contains forward-looking statements. Forward-looking statements are statements that are not historical facts; they include statements about our beliefs and expectations and the assumptions underlying them. These statements are based on plans, estimates and projections as they are currently available to the management of Deutsche Bank. Forward-looking statements therefore speak only as of the date they are made, and we undertake no obligation to update publicly any of them in light of new information or future events.

By their very nature, forward-looking statements involve risks and uncertainties. A number of important factors could therefore cause actual results to differ materially from those contained in any forward-looking statement. Such factors include the conditions in the financial markets in Germany, in Europe, in the United States and elsewhere from which we derive a substantial portion of our trading revenues, potential defaults of borrowers or trading counterparties, the implementation of our management agenda, the reliability of our risk management policies, procedures and methods, and other risks referenced in our filings with the U.S. Securities and Exchange Commission. Such factors are described in detail in our SEC Form 20-F of 26 March 2008 under the heading “Risk Factors.” Copies of this document are readily available upon request or can be downloaded from [www.deutsche-bank.com/ir](http://www.deutsche-bank.com/ir).

This presentation may also contain non-IFRS financial measures. For a reconciliation to directly comparable figures reported under IFRS refer to the 2Q2008 Financial Data Supplement, which is accompanying this presentation and available on our Investor Relations website at [www.deutsche-bank.com/ir](http://www.deutsche-bank.com/ir).
