(1) Includes net effect of losses related to write-downs on specific risks in our structured credit business of approx. EUR (300) m, offset by net mark-ups of EUR 263 m (mainly monolines)

Key features

Overall

- Seasonal slowdown exacerbated by aftermath of sovereign risk concerns
- Reduction of volumes in July / August partially offset by rebound in September, but continued margin decline
- Broad diversification of franchise led to comparable y-o-y result

FX / Money Markets / Rates

- Strong FX performance y-o-y with increase in volumes counterbalancing margin decline
- Solid results in Money Markets and Rates but lower y-o-y reflecting market normalisation, partially offset by increased demand for rates solutions
- For the fifth time in six years, Deutsche Bank was ranked #1 overall in Risk Magazine's annual Risk Interdealer poll

Credit

- Strong overall performance y-o-y
- Q-o-q increase in client activity across flow and distressed trading given improved issuance environment and increased demand for client solutions

Emerging Markets debt

- Strong performance q-o-q, improved results in Latin America and Central Europe
- Voted Best Risk Management in CEEMA, LatAm and Middle East by Euromoney (July 2010)

Commodities

- Lower revenues y-o-y reflecting low volatility environment

Sales & Trading equity

Net revenues

In EUR m

Note: Prior periods have been adjusted due to a transfer between S&T (debt) and S&T (equity)

Key features

Overall

- Significantly reduced client flows due to lower investor risk appetite and lack of primary activity
- Maintained market share across all products and regions

Cash Equities

- Strong performance despite significantly lower market volumes
- Good results in Asia and U.S. reflecting ongoing investment

Equity Derivatives

- Decline in revenues q-o-q and y-o-y
- Driven by significantly lower client activity in structured and flow business

Prime Brokerage

- Stable performance despite increasingly competitive environment and lower margins
- Seasonally lower balances offset by on-boarding of clients and uptake of new products

Designated Proprietary

- Exited business during quarter

■ Negative goodwill⁽¹⁾

(1) EUR 208 m gain representing provisional negative goodwill from the commercial banking activities acquired from ABN AMRO in the Netherlands

Key features

Overall

- Continued shift to fee income y-o-y counterbalancing impact of the low interest rate environment
- Improved overall performance y-o-y but seasonal decline q-o-q

Trade Finance

- Another strong quarter supported by sustained demand for international trade products and market share gains, especially in Germany

Cash Management

- Continued positive trend in fee income based on higher clearing volumes compensating for the impact from new payment regulations
- Retained #1 position in EUR Clearing and Western European Corporate Cash Management in the 2010 Euromoney Poll

Trust & Securities Services

- Solid performance mainly driven by direct securities services business in Asia

■ Severance⁽¹⁾

(1) Includes direct severance booked in business and allocations of severance booked in infrastructure

Key features

Overall

- Best quarter since Lehman bankruptcy, driven by revenue growth, continuously reduced provision for credit losses and stable costs

Revenues

- **Deposits:** Another record quarterly result, volumes stabilized at high level
- **Credit Products:** Robust Mortgage results, Consumer Finance decreasing in line with strategy
- **Investment & Insurance Products:** Solid development in spite of usual holiday season during third quarter
- Gain on sale of (AfS) securities from DB Bauspar Portfolio according to rebalancing strategy

Provision for credit losses

Further reduced reflecting active credit portfolio management and good portfolio quality

Expenses

- Stabilized cost base q-o-q due to effective cost management and effects from efficiency program, despite absorbing impact for strategic projects and other one-offs

Basic shares (denominator for basic EPS)	697	700	695	682	701	692
Dilution effect	24	26	0			
Diluted shares (denominator for diluted EPS) ⁽³⁾	721	726	695			

Note: Figures may not add up due to rounding differences

(1) The number of average basic and diluted shares outstanding has been adjusted for all periods in order to reflect the effect of the bonus component of subscription rights issued in September 2010 in connection with the capital increase

(2) Still restricted

(3) Due to the net loss situation for the three months ended 30 September 2010 potentially dilutive shares are generally not considered for the EPS calculation, because to do so would be anti-dilutive; under a net income situation however, the number of adjusted weighted average shares after assumed conversions would have increased by 26.6 million shares for the three months ended 30 September 2010

Cautionary statements

This presentation contains forward-looking statements. Forward-looking statements are statements that are not historical facts; they include statements about our beliefs and expectations and the assumptions underlying them. These statements are based on plans, estimates and projections as they are currently available to the management of Deutsche Bank. Forward-looking statements therefore speak only as of the date they are made, and we undertake no obligation to update publicly any of them in light of new information or future events.

By their very nature, forward-looking statements involve risks and uncertainties. A number of important factors could therefore cause actual results to differ materially from those contained in any forward-looking statement. Such factors include the conditions in the financial markets in Germany, in Europe, in the United States and elsewhere from which we derive a substantial portion of our revenues and in which we hold a substantial portion of our assets, the development of asset prices and market volatility, potential defaults of borrowers or trading counterparties, the implementation of our strategic initiatives, the reliability of our risk management policies, procedures and methods, and other risks referenced in our filings with the U.S. Securities and Exchange Commission. Such factors are described in detail in our SEC Form 20-F of 16 March 2010 under the heading “Risk Factors.” Copies of this document are readily available upon request or can be downloaded from www.deutsche-bank.com/ir.

This presentation also contains non-IFRS financial measures. For a reconciliation to directly comparable figures reported under IFRS, to the extent such reconciliation is not provided in this presentation, refer to the 3Q2010 Financial Data Supplement, which is accompanying this presentation and available at www.deutsche-bank.com/ir.
